The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 2002-210494 to Kazuki et al.

With respect to claim 1, Kazuki et al disclose ultraviolet oxidation equipment 13 and a catalyst mixed tower 14 located downstream of the ultraviolet oxidation equipment 13 having catalyst supports each of which has a catalyst carried on a anion exchange resin support (see paragraph 20 of the machine translation included in the IDS filed on 11-25-06).

Regarding claim 2, Kazuki et al disclose a membrane degasser 15 (e.g., the film deaerator mentioned in paragraph 33 of the machine translation) and a demineralization equipment 16 located downstream of the catalyst mixed tower 14.

As to claim 3, Kazuki et al disclose the demineralization equipment 16 as being a mixed bed (see paragraph 28 of the machine translation).

Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by US 6,884,344 to Yamashita et al.

With respect to claim 1, Yamashita et al disclose ultraviolet oxidation equipment 5 and a catalyst mixed tower 17 located downstream of the ultraviolet oxidation equipment 5 having catalyst supports each of which has a catalyst carried on a anion exchange resin support (see lines 15-17 of col. 7).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamashita et al.

With respect to claim 2, Yamashita et al disclose a membrane degasser 10 and a demineralization equipment 20. Yamashita et al discloses demineralization equipment as being located downstream of the catalyst mixed tower 17 but fails to say that a membrane degasser is disposed downstream of the catalyst mixed tower 17. Yamashita et al disclose that other treatment devices can be present between the catalyst mixed tower 17 and impurity removal device 19 which includes the demineralization equipment 20. Yamashita et al also teach that excessive amounts of gas in the liquid will interfere with wash treatment (see lines 10-15 of col. 6). It would have been obvious to have provided an additional membrane degasser downstream of the catalyst mixed tower in

order to remove any excess gas that would interfere with wash treatment since Yamashita et al disclose that additional equipment may be disposed between the catalyst mixed tower and impurity removal device.

As to claim 3, Yamashita et al disclose the demineralization equipment 20 as being a mixed bed (see lines 28-35 of col. 8).
